

Name

Directions: Using the resources provided, supported by logical reasoning, complete the Venn diagram with a minimum of three points in each of the larger circles, two in overlapping sections, and one in the center. Then answer the questions that follow.

1. Considering your strengths, which section of the diagram represents the group of students you most effectively engage and challenge? What about your teaching philosophy and style resonates with these students?
2. Which section of the diagram represents the group of students who pose the greatest challenge for you? Why?
3. What are three specific actions you will take to better engage and challenge these students?
